

# **Tiens Double-cellulose Tablets**

## **What is Cellulose?**

Cellulose is especial ingredien in food that can not be resolved by the human intestines and stomach digestive enzyme and can't be digested.

Cellulose is a kind of important nutrient side by side with 5 crucial nutrients ——Protein, Carbohydrate, Lipid, Vitamin, Mineral.

## **Constipation——**

## **Affliction of modern people**

The function of elimination is as important as ingesting to maintain healthy state to the human body. If the course of elimination can't work smoothly, it can brings great injury to health.

With the constant improvement of the modern people living standards, the food becomes more and more exquisite, and there is few and few Cellulose in it.

So the constipation has already become the common disease among crowds.

**Long time constipation can cause harmful material store up, and**

**lead to:**

- 1) Suffer from the internal heat.
- 2) Serious influence of quality of the skin.
- 3) Cause the intestine tumors.
- 4) And is easy to cause the heart and brain diseases.

## **Functions of Cellulose:**

### **1 □ Regular the function of intestine, balance the bacterium, improve constipation.**

Modern medical science thinks: " The cellulose is a cleaner of intestines ".

Cellulose can improve the multiplication of beneficial bacterium and restrain deleterious bacterium in our intestines.

It can improve the function stomach & intestine, make the human body absorb nutrition effectively.

### **2 □ Decrease the absorption of lipid, prevent the heart and blood vessel diseases.**

The content of harmful lipid in blood rising up is the reason of cardiovascular & cerebrovascular diseases!

The key of preventing cardiovascular & cerebrovascular diseases is to reduce content of those harmful blood lipid □

The cellulose has function of reducing the absorption of lipid, have

satisfactory results in alleviating the heart disease, can improve the cardiovascular system function and has not found any side effect .

### **3 It is helpful for beautiful body-forming.**

Cellulose can reduce the absorption of carbohydrate and lipid, thus can prevent being fat and several chronic disease caused by it.

### **4 Clear away the poison and prevention of the intestine tumors.**

Cellulose can absorb water and expand, make stool be easy to discharge out of intestines, thus reduce the absorption of the harmful substance among them.

Epidemiology studies find that the less intake of cellulose, the more intestine tumour cases.

### **5 Prevent and improve diabetes & cholelith disease.**

The cellulose can delay the absorption of the glucose, contribute to improving the diabetes.

Increase the cellulosic content in the meal, can reduce the content of cholesterol in the blood vessel and prevent the cholelithiasis.

## **Who needs to supply cellulose**

Constipation for a long period

People with bad function of intestine system.

Suffer from internal heat

Skin dried without beauty

busy living, irregularly eating

People on Diet

People with diabetes

People with hyperlipemia

**One Tiens double –cellulose capsule,  
equal to 500 g corns or 800g apples.**

## **Tiens Double-cellulose Tablets**

- 1) Contain pure natural high quality materials, under advanced produce skills, with more biology activity, better health care effects.
- 2) Get FDA certification □ can be sold in the whole world.
- 3) Pure natural, high quality scientific & prescription.
- 4) with solubility and non-solubility celluloses, the effect is much better.
- 5) Convenient to take.
